

DIFFERENTIAL PRESSURE TRANSMITTERS

MEASUREMENT OF DIFFERENTIAL PRESSURE

Measurement of differential pressure is useful in a broad range of applications. It is used in ventilation and air-conditioning technology but also in many areas of air handling process technology. The table below shows a number of these. You can find more information about pressure sensor technology on p. 6.

halstrup-walcher offers a wide range of products for stationary measurement of differential pressure.

	PUC24	PUC28(K)	P26	P34	P29	PU/PI/PIZ	P82R(M)	PS27	REG21
Details on	p. 24	p. 25	p. 26	p. 27	p. 28	p. 29	p. 30	p. 31	p. 32
									
Application	Process monitoring for clean-rooms (Pa, °C, % rH), with stainless steel front	Process monitoring panel (optional: with calibration port) (Pa, °C, % rH), aluminium, anodised	High precision, scalable differential pressure transmitter	Measuring transmitter with very small dimensions – ideal for the control cabinet	Like P26, for natural gas	For standard applications. PIZ: PI in two wire technology	Square-root standard differential pressure transmitter	A basic sensor for simple applications	Measurement and regulation of pressure
Housing installation	Installed in wall (panel)		Mounted on a wall/top-hat rail						Rack
Max. measurement range	± 250 Pa		± 100 kPa			± 100 kPa	± 20 kPa	± 100 kPa	
Min. measurement range	± 100 Pa		± 10 Pa		± 250 Pa	± 50 Pa	± 100 Pa	± 50 Pa	
Degree of measurement uncertainty	0.5 % ¹⁾ (standard)	0.5 % ¹⁾ (standard)	0.2 % of the scaled range (40.. 100 % of max. value) ²⁾ (optional) 0.5 % of the scaled range (40.. 100 % of max. value) ²⁾ (standard)		0.2 % ¹⁾ (optional) 0.5 % ¹⁾ (standard)	0.2 % ¹⁾ ²⁾ ³⁾ 0.5 % ¹⁾ ²⁾ 1 % ¹⁾	1 % ¹⁾	2 % (≥ 100 Pa) or 3 % (for 50 Pa) of the set value	0.5 % ¹⁾ ²⁾ 1 % ¹⁾

Pressure ports

We can supply a wide range of customer-specific pressure ports, e.g. various cutting ring couplings or hose connectors.

MEASUREMENT OF DIFFERENTIAL PRESSURE AND REGULATION OF PRESSURE

... IN CLEANROOMS

In cleanrooms, it is vital to prevent contaminated air flowing in from corridors or areas with lower cleanroom classifications. This can be achieved by **maintaining a continuous overpressure** inside the cleanroom. The heart of this system is a high-precision differential pressure transmitter operating in the low Pascal range

- for installation in a wall (panel), (e.g. PUC, see p. 24 and p. 25)
- for installation in a control cabinet (top hat rail) (e.g. P 26, see. p. 26)
- for mounting on a wall (e.g. P 26, see. p. 26)

The standard ISO 14644 requires continuous monitoring and regulation of pressure for all cleanrooms. In addition, spot checks must be performed at regular intervals.

- use of the KAL portable, high precision calibration and measurement device (see p. 44 and 45)

... IN HOSPITALS

Excluding air that contains bacteria can be a matter of life and death, especially in hospitals, e.g. operating theatres. Here, too, this is achieved by ensuring a constant **overpressure** in the room that prevents contaminated air entering it from surrounding areas.

The opposite applies to isolation wards, which are used to prevent the spread of epidemics. In this case, the room must be kept at a constant **underpressure** relative to its surroundings in order to prevent bacteria/viruses escaping.

MEASUREMENT OF DIFFERENTIAL PRESSURE AND REGULATION OF PRESSURE

... IN FILLING MACHINES AND HYGIENIC PLANTS

Hygiene and bacteria-free environments are key requirements in both the pharmaceutical and food processing industries. This is achieved through selecting the appropriate materials and time-consuming cleaning processes. But what happens if the goods being protected come into contact with the surrounding air? If this air has not been correctly processed, it will transport microbes and other contaminants (oil aerosols, particles etc.) directly to the endangered product.

For larger hygienic production plants, the construction of whole cleanrooms is a viable option. However, this approach may be inefficient if only a small, enclosable hygienic area is required. The solution to this problem was the development of "*mini-environments*" – isolated, hygienic areas. These ensure that no microbes or contaminants are able to penetrate the protected area.

Measurement and regulation of differential pressure are the keys to maintaining a constant and safe **overpressure** within the mini-environment. Long-term stability is critical in order to prevent unplanned decreases in pressure over time. halstrup-walcher is a specialist in this type of application and offers

- for mounting on walls or top-hat rails: P26 (see p. 26)
- for mounting in walls (panel version): PUC24 or PUC28K (see p. 24/25)

The **pressure** in the filling room must be **higher** than that of the surrounding areas or particles/oil etc. may enter the zone in which the product is being handled.

Measurement ranges	± 100 Pa or ± 250 Pa freely scalable within this range
Margin of error	0.5 % of max. value
Temperature coefficient span	0.03 % of max. value/K (10..50 °C)
Temperature coefficient zero point	± 0 % (cyclical zero-point correction)
Overload capacity	200 x
Medium	Air, all non-aggressive gases
Max. system pressure	10 kPa
Sensor response time	25 ms
Time constants	25 ms..40 s (adjustable)
Input signal humidity/temperature module (galvanically separated)	0..10 V, $R_i = 470 \text{ k}\Omega$ 0/4 ..20 mA, $R_i = 50 \text{ }\Omega$ adjustable
Operating temperature	10..50 °C
Storage temperature	-10..70 °C
Power consumption	approx. 7 VA
Weight	approx. 1 kg
Pressure ports	for tubing NW 3..6 mm
Protection class	IP 65 (recessed in the wall)
Certificates	CE

Supply voltage

24 VDC, ± 10 % smoothed

Output

0..10 V ($R_i > 2 \text{ k}\Omega$)
0/4 ..20 mA ($R_i < 500 \text{ }\Omega$) adjustable

2 contact points, 6 A, 230 VAC,
may be configured as desired within this pressure range

Measurement range

PUC24

Can be pre-set on request:

Time constant, relay parameter, analogue output,
deactivation of the cyclic zeroing (only for PROFIBUS DP)

PUC 24

Features

- Cleanroom panel (stainless steel) for displaying air-conditioning data
- Integrated, high precision measurement of differential pressure
- % rH/°C pressure transmitter, switchable (independent of manufacturer)
- Optimum cleanroom design (TU Munich/Weihenstephan)
- Solvent resistant stainless steel surface
- 3 analog outputs, optional digital interface
- Acoustic alarm when the threshold value is exceeded, acknowledgement via key
- Optical alarm signal if critical values are exceeded; the display values are shown cyclically inversed/normal
- Bilingual menu (German/English) (others on request)
- Two contact points (6 A/230 VAC)
- Two adjustable limit switches permit the connection of signalling devices and save additional wiring (optional)

Features

- Process panel (Aluminium, anodised) for displaying air-conditioning data
- Integrated, high precision measurement of differential pressure
- % rH/°C pressure transmitter, switchable (independent of manufacturer)
- Anodised, aluminium housing with easy-to-clean front surface
- With external calibration ports (*design "K"*), for on-site calibration without disassembly
- 3 analog outputs, optional digital interface
- Acoustic alarm when the threshold value is exceeded, acknowledgement via key
- Optical alarm signal if critical values are exceeded; the display values are shown cyclically inversed/normal
- Bilingual menu (German/English) (others on request)
- Two contact points (6 A/230 VAC)
- Two adjustable limit switches permit the connection of signalling devices and save additional wiring (optional)

P26							

Can be pre-set on request:
Time constant, relay parameter, analogue output root-extracted / linear, deactivation of the cyclic zeroing

P 26

For P26 with air meter function see p. 14

Features

- High precision differential pressure transmitter for top-hat rail or wall mounting (air-conditioning, cleanroom, process)
- Wide range of units available for pressure and volume flow, also $\pm$ measurement ranges
- Scalable measurement ranges and units
- Zero-point calibration prevents zero-point drift
- Built-in valve provides a high level of overpressure protection
- Multilingual menu (German/English/Italian/French)

Optional

- Contact points with adjustable switching outputs
- Set the zero-point via the interface
- USB interface (free parameterisation software at www.halstrup-walcher.com)
- Air meter function (see p. 14)

Features

- Differential pressure transmitter with very small dimensions – ideal for control cabinet installation
- Optionally with temperature analogue input and internal stat. pressure sensor for P-/T-compensated volume flow
- Optionally with relay
- Volume flow can be configured via k-factor, dPmax/Vmax or 20 individual values
- With USB interface: via PC-software (password-protected), scaling, characteristic line form and many other parameters can be set
- Delivery possible already completely integrated into the control cabinet (on request)

Easy Mounting:

The differential pressure transmitter P 34 is particularly developed for space-saving mounting in control cabinets.

Measured data differential pressure

Time constant, relay parameter, analogue output root-extracted / linear, deactivation of the cyclic zeroing

TÜV-tested:

As long as a specified flushing process is observed, special electronic encapsulation safely separates any ignition sources from natural gas.

P 29

Features

- TÜV-tested differential pressure transmitter for natural gas
- Design changes and technical modifications keep ignition source and gas mixture safely separated (not suitable for Ex-applications)
- Also ± measurement ranges
- Scalable measurement range and display
- For pressure and volume flow measurement
- Zero-point calibration prevents zero-point drift
- Built-in valve provides a high level of overload protection
- Also suitable for top-hat rail mounting
- Multilingual menu (German/English/Italian/French)

P29 with display

P29 without display

Features

- Differential pressure transmitter with linear curve for air-conditioning applications
- Also available as a two-wire system ("PIZ" model)
- Also for $\pm$ measurement ranges and asymmetric measurement ranges
- With optional LCD

PU/PI with display

PU/PI without display

P 82 R/ P 82 RM ²⁾	—	—	—	—	—

²⁾ with optional metal housing

Relay parameter can be pre-set on request.

P 82 R/P 82 RM

Features

- Differential pressure transmitter with root-extracted curve for volume flow applications
- High level of accuracy and long-term stability
- Very little hysteresis; largely independent of temperature
- Easy-to-read display (optional)
- With optional metal housing (P 82 RM)

³⁾ with optional metal housing

PLEASE NOTE: The P 82 R has been replaced by the P 26 / P 34!

Features

- Compact differential pressure transmitter for basic applications
- Also available with two-wire technology (optional)
- With optional display
- Either with one fixed measurement range or toggling between 4 different measurement ranges
- 4 measurement ranges can be selected via jumpers (optional)
- With $\pm$ measurement ranges and asymmetric measurement ranges
- With option relay (6 A)
- Suitable for top-hat rail mounting and wall surface installation

Can be pre-set on request:
Time constant and relay parameter

Measurement ranges others available upon request	50/100/250/500 Pa 1/2.5/5/10/20/50/100 kPa
Margin of error (0.3 Pa margin of error for the reference)	0.5 % of max. value, min. 0.3 Pa or 1 % of max. value
Temperature coefficient span	0.04 % of max. value/K (10 .. 60 °C)
Temperature coefficient zero point	± 0 % (cyclical zero-point correction)
Overload capacity	200 x for measurement ranges < 2.5 kPa 600 kPa for measurement ranges ≥ 2.5 kPa
Medium	Air, all non-aggressive gases
Max. system pressure	10 kPa for measurement ranges ≤ 10 kPa Max. nominal pressure of sensor for measurement ranges above 10 kPa
Sensor response time	20 ms
Display	4 ½ digit
Time constants	adjustable up to 10 s
Operating temperature	10 .. 60 °C
Storage temperature	-10 .. 70 °C
Power consumption	approx. 5 VA
Weight	approx. 0.8 kg
Pressure ports	for tubing NW 6 mm
Protection class	IP 50 (installed)
Certificates	CE

Output	A
0 .. 10 V ($R_L \geq 2 \text{ k}\Omega$)	1
± 5 V ($R_L \geq 2 \text{ k}\Omega$)	5
0 .. 20 mA ($R_L \leq 500 \Omega$)	0
4 .. 20 mA ($R_L \leq 500 \Omega$)	4

Measurement range	B
Measurement range (e.g. 0 .. 100 Pa, -10 .. 40 mbar, 0 .. 200 mmHg etc.)	

Margin of error	C
0.5 % of max. value, min. 0.3 Pa	05
1 % of max. value (standard)	1

Power supply	D
24 VDC, +20 %/-15 %	24D
24 VAC, +6 %/-15 % (50/60 Hz) (with galvanic separation)	24A
115 VAC, +6 %/-15 % (50/60 Hz)	115
230 VAC, +6 %/-15 % (50/60 Hz)	230

Contact points	E
2 relays with floating changeover contacts 230 VAC (50/60 Hz), 6 A	R
2 transistors with open collector $U_{CE} \leq 50 \text{ V}$; $I_C \leq 200 \text{ mA}$, floating	T

Order code	A	B	C	D	E
REG 21					

Can be pre-set on request:
Time constant, relay parameter,
deactivation of the cyclic zeroing

REG 21

Features

- Pressure measurement and regulation in a device
- Accurate measurement of differential pressure with automatic zero-point calibration and high overload protection
- Switching outputs can be used as 2-point regulator (pressure switch), for activating/deactivating a final control element (e.g. pump), with relay hysteresis
- Switching outputs can be used as a 3-point regulator (e.g. ON 1 - OFF - ON 2) for activating/deactivating two final control elements, (e.g. air intake/outflow fans), with relay hysteresis
- Asymmetry also possible, e.g. -10 .. 40 mbar
- Housing: control panel housing (installed)

Panel housing / control panel installation
