

# Concept Smoke Systems

## Positive Injection Pump

This pump will allow the user to transport easily and without smoke emissions, the aerosol generated to the injection point. It works with any thermal or pneumatic generator. The pump is supplied with a set of 316L stainless steel triclamp fittings and can be connected to a 50 or 32 mm diameter hose.

This pump is delivered as standard with a dimmer to adjust the quantity of air to be blown into the air treatment system to be tested, all packaged in a "flight case" type suitcase with 5m of hose and all stainless steel fittings.

Performance	45 m3/h 60 mbar
Material	Aluminium pump with 316L stainless steel fittings and power variator
Power	230 VAC 50 Hz 0,25 Kw
Dimensions (L x H x P)	290x270x290 mm
Weight	8 kg
Accessories	Supplied as standard with carrying case, 5m of hose (other lengths available), 2.5" and 2" tri-clamp connector
