

Infralyt M

The Gas measuring device for petrol vehicles *compact, reliable, smart!*

With Infralyt M you can quickly and conveniently carry out the statutory 4 gas measurement on petrol vehicles as part of the periodic technical inspection. The measuring device impresses with the latest technology for reliable emissions tests.

Compact.

The low weight and compact dimensions make the device the ideal companion for mobile emissions testing.

Reliable.

High-quality materials and the robust design ensure a long-lasting measuring device with a high availability.

Smart.

Integrated WLAN enables integration into the workshop network for the transmission of measured values or error analysis remotely.

FEATURES

- PTB-Approval conform to OIML class 0
- gas sampling probe with 7 m hose
- color touch display for controlling and displaying measuring values as well status
- communication via WLAN / Bluetooth / USB
- internal logbook for documentation of maintenance, service, calibration, etc.
- Semi-automatic calibration

Additional free measurements:

- internal data logger with export to USB
- Remote control via smartphone or PC

TECHNICAL SPECS

Measuring range	CO CO ₂ HC NO (optional) O ₂ Lambda	0 - 10 % Vol. 0 - 20 % Vol. 0 - 2500 ppm Vol. 0 - 5000 ppm Vol. 0 - 22 % Vol. 0 - 9,999
Operating temp.	5 - 45 °C	
Accuracy	OIML Klasse 0	
Interfaces	USB Serial, WLAN, Bluetooth [®] class 1 (100m)	
Power	220 V / 50 Hz, 110 V / 60 Hz	
Dimensions (B x H x T) in mm	204 x 198 x 350	
Mass	5,5 kg
