## GENERAL CHARACTERISTICS

The principle of operation of these instruments is based on the drive of one or more magnetic reed contacts, placed inside of the measuring rod, by one or more floats. The only moving element is the float that moves, for buoyancy, along the measuring rod, this guarantees extreme robustness and a limited need for maintenance.

## - Stainless steel - AISI 316

- Up to 6 switch points.
- Working pressure up to 50 bars depending on the used float.
- Operating ambient temperature $-30 /+55^{\circ} \mathrm{C}$ UR $90 \%$.
- Standard working temperature $105^{\circ} \mathrm{C}$.
- Executions up to $180^{\circ} \mathrm{C}$ on request.
- Minimum degree of protection IP65.
- Built-in temperature sensors, on request. PT - PTC - NTC - Thermostat.
- ATEX $\left\langle\varepsilon_{x}\right\rangle$ Constructions (See Multipoint E - Multipoint I series)
