The smoke produced by Concepts smoke generators has been rigorously tested to ensure that in normal conditions it is non toxic. Independent health and safety reports (available on request) indicate that dense smoke concentrations can be entered without any serious health risk for short periods of time.

In the concentrations typically required for Air Trace applications, no respiratory protection would be required, although we do recommend in general terms that those suffering from asthma or with a severe respiratory condition should not be subjected to artificial smoke / fog from any device
